Introduction

In the past, information related to Alberta's agricultural exports was presented in two reports; Alberta's Agricultural Exports - Commodity by Country and Alberta's Agricultural Exports - Country by Commodity. In order to provide a more wieldy reference and to reduce certain ambiguities in commodity classification, the best qualities of these publications have been combined to form a single report called Alberta's Agricultural Exports.

Sources and Methods

Out-of-province shipments includes sales to other provinces in addition to out-of-country exports. The methodology employed for estimating out-of-province shipments called for data from a number of sources.

The bulk of primary out-of-country export data was obtained from Statistics Canada, International Trade Division. This was supplemented by information from other government sources and from industry. In a number of cases adjustments to Statistics Canada data were required in order to overcome inadequacies in province of origin identification.

Out-of-Province Shipments

The value of out-of-province shipments climbed significantly in 1988 reaching $3,786 million, an increase of almost 31 per cent.

The bulk of the increase was a result of substantial growth in the value of grain and oilseed export sales. Sales of livestock also grew while meat shipments fell.

Export Overview

Alberta's exports of primary and processed agricultural products reached an estimated $2,431 million in 1988. This represents an increase of approximately $611 million or almost half of the $1,347 million expansion in Canada's agricultural exports. The most significant advances were achieved in sales of wheat, live cattle, live hogs, canola and canola oil.

Alberta's wheat exports expanded by 58 per cent, accounting for 29 per cent of Canada's agricultural export growth. The value of out-of-country shipments of wheat were estimated to be $1,068 million; 24 per cent of the Canadian total. Major gains were made in sales of milling quality varieties to traditional customers such as the People's Republic of China (PRC) and the USSR. This was especially the case with the PRC where domestic policies in recent years have motivated producers to devote a larger share of acreage to non-cereal commodities thus creating a need for imported product.

The value of Alberta's live cattle exports increased by some $115 million in 1988, reaching a record high of $222.4 million. Low feed costs in 1987 and early 1988 and the favourable economics of feeding cattle to heavier weights for shipment to the U.S. induced feeders to expand their inventories. Although many of the extra cattle were absorbed by a 7 per cent increase in Alberta's slaughter, the majority moved south.

Alberta's share of cattle export value grew from 44 per cent in 1987 to 50 per cent in 1988, as volumes grew at a faster rate than the Canadian total.

Canola exports advanced 20 per cent in 1988 to $39 million as fears of drought induced supply shortages were reflected in market prices which reached 4 year highs in June and July. The high cost of seed and a growing recognition by health conscious Americans of canola oil as a more desirable edible oil, resulted in an estimated increase in sales to the U.S. of $20.2 million.

A combination of high U.S. demand for slaughter animals and a capacity reducing labour dispute resulted in a four fold increae in hog exports to the U.S. In 1988, 436,533 head valued at $54 million were exported , as compared to 98,364 head worth $15 million in 1987.

Trading Partner and Regional Review

In 1988 Alberta's most significant export markets included the United States, Japan, the People's Republic of China, the USSR, Iraq and Taiwan. These countries purchased 75 per cent of Alberta's agricultural exports.

Asia as a whole purchased $1,119 million worth of agricultural products, accounting for 46 per cent of the total value of exports. The U.S. and other North American countries were second in terms of their value of purchases, accounting for 25 per cent of the total. Following Asia and North America were Eastern Europe (10 per cent of exports), the EEC (6 per cent) and the Middle East and South-Central America both at approximately 5.5 per cent.

United States

The U.S. was Alberta's biggest export customer in 1988, purchasing in excess of $595 million worth of agricultural products. This represented an increase of approximately 36 per cent over 1987. Growth in sales of live cattle and hogs accounted for much of the improvement.

The favourable economics of feeding cattle suitable for export to the U.S. contributed to an increase in volume of 114,437 head. The total value of cattle exports exceeded $218 million, representing a gain of approximately $113 million.

Labour problems, which reduced slaughter capacity in Alberta in 1988, led to a substantial increase in live hog movement to the US. Numbers grew from 98,262 head in 1987 to 436,232 head in 1988. The value of exports advanced more than $38 million. However, the reduced capacity also contributed to a fall in pork exports of approximately $28 million.

Other products which displayed notably improved export performance to the U.S. were oats and canola oil. These commodities have enjoyed growing acceptability in the U.S. due to their high quality and health attributes.

Asia

Alberta's exports of agricultural products to Asia increased markedly in 1988, advancing by $392 million. Sales were bolstered by strong wheat and canola prices and moderate gains in the volume of wheat shipments.

Japan

Japanese agricultural imports from Alberta were estimated to be over $471 million. This represents an annual increase of $117 million or 33 per cent.

With a value of $205 million, canola seed purchases by Japan accounted for 44 per cent of total imports from Alberta. While this value represents an increase of $59 million, volumes fell by approximately 13,000 tonnes. This reflects the overall strength of global oilseed prices in 1988.

Strong demand for feed stuffs in Japan led to good growth in their imports of Alberta barley and dehydrated alfalfa. The value of barley rose by $19 million to $50 million while dehydrated alfalfa shipments grew by $11 million.

The recent beef and citrus agreement between the U.S. and Japan should provide new opportunities for marketing Alberta beef as a result of less restrictive quotas.

People's Republic of China

Chinese policies in recent years have motivated producers to devote more acreage to freely priced open market commodities. The result has been a greater reliance on outside sources for cereal crops.

China's purchases of wheat from Alberta increased by 575,391 tonnes in 1988. This, combined with substantial price advances, led to an increase in the value of wheat imported by China of $284 million.

Other Asia

Other Asian countries which had notable changes in their imports of Alberta agricultural products in 1988 included India, Indonesia and South Korea.

The value of Indian imports of canola oil increased from $15 million in 1987 to $33 million in 1988. Volumes grew to 76,993 tonnes from 39,156 tonnes.

Indonesian imports of wheat climbed from $5 million to $14.5 million based on moderate volume increases and strong price gains. Purchases of wheat by South Korea on the other hand fell dramatically from $33 million in 1987 to $1.1 million in 1988.

Eastern Europe

Exports to Eastern Europe totalled $231 million in 1988, an increase of 24 per cent over 1987. This was due mainly to substantial gains in the value of wheat shipments.

USSR

The value of Alberta's wheat exports to the USSR grew by $86 million to $220 million, bolstered by strong prices and moderate growth in volumes.

EEC

Shipments to countries of the European Community increased by $25 million in 1988, reaching $145 million. Improvements were evident in exports of wheat to the United Kingdom and Italy, and sales of horsemeat, barley and dried peas to Italy, West Germany and Belgium/Luxembourg.

Middle East

While the value of wheat exports to countries such as Iran and Iraq had strong gains in 1988, the value of barley sales to Saudi Arabia fell significantly due to relatively limited Alberta supplies. The overall result was a marginal increase in Alberta's agricultural exports to the Middle East of $6 million.

Latin America

Agricultural exports to the countries of Latin America fell by $25 million in 1988. This was due for the most part to a dramatic decline in wheat exports to Brazil. Sales in 1988 were $0.3 million as compared to $30 million in 1987. This was a result of agreements arranged between Brazil and Argentina which were designed to increase their bilateral trade.

ESTIMATED

OUT-OF-PROVINCE

SHIPMENTS

1988

ESTIMATED OUT-OF-PROVINCE SHIPMENTS - 1987 SUMMARY

	Quantity -tonnes-	Value $000
Grains and Oilseeds	10,304,000	1,116,565
